

Coral Reef Animals: make your own reef

You will need:

Scissors

Glue

Colourful paper/glitter/decorating materials

The reef animal templates printed on thin card

Use the templates to make a shark, angel fish, nudibranch, moray eel, parrotfish or starfish like the ones below. If you want to take this activity further you can make a coral reef from cardboard boxes and a covering sheet so the reef animals have a home – and use string to hang the swimming fish above the reef.
