

Coral Reef collage

You will need:

Coral reef pictures, scissors, glue, card, colouring pens and pencils.

Collect images of different corals, fish and sea creatures from magazines and newspapers and create a collage of a healthy reef. You can draw too.

Check that you have all of the following parts to your reef and explain why this helps make it a healthy reef:

Lots of different corals

Many species of fish

Sharks, turtles, dolphins, eels, octopus and other big sea creatures

No rubbish

No big fishing boats
